

# What Rocks on Your Block? Building Stones Walking Tour

## Instructions

- Determine which types of rocks were observed at each station by filling in the Venn diagram. For example, if Station 1 only had igneous rocks, you would write "Station 1" in the igneous rock circle. Some stations will have several different rock types.
- Provide specific data for each stop by filling in the data tables on the following pages.

## Rock Type Venn Diagram

## What Rocks on Your Block? Building Stones Walking Tour

### Summary of Data Observed — Stops 1-10

Stop Number	Rock types observed (igneous, sedimentary, metamorphic)	Minerals found within the rocks	Distinguishing features and notable observations

## What Rocks on Your Block? Building Stones Walking Tour

### Summary of Data Observed — Stops 11-20

Stop Number	Rock types observed (igneous, sedimentary, metamorphic)	Minerals found within the rocks	Distinguishing features and notable observations
